

MONISH JAGADISH HALLEGERE

Full Stack Software Engineer

Melbourne, VIC | +61 426 249 519 | monish2800@gmail.com | linkedin.com/in/monish-jagadish-hallegere-903170160 | github.com/Monish-2800 | monish-2800.github.io

PROFESSIONAL SUMMARY

Full Stack Software Engineer with nearly 4 years across the software development lifecycle, building backend services and **React** frontends in the logistics and NDIS domains. Object-oriented backend specialist in **Java** and **Spring Boot**, with production experience on **AWS** (EC2, S3, RDS), event-driven architecture using **Apache Kafka**, and secure authentication via **JWT** with role-based access control. Ships reliable, well-tested software end to end and automates delivery through Jenkins and GitHub Actions **CI/CD**. Master of Information Technology, Monash University.

EXPERIENCE

Software Engineer, Gencare Disability Services Pty Ltd, Melbourne, Australia

June 2024 - Present

- Design and ship 5+ backend **REST APIs** in Java and Spring Boot over SQL, powering participant enquiries, service requests, and end-to-end NDIS workflow management.
- Build 10+ responsive React screens (JavaScript, HTML, CSS) that lifted service visibility for participants and staff across desktop and mobile.
- Drive architecture decisions and code reviews, raising and enforcing engineering standards across the team.
- Harden reliability with JUnit and Mockito test suites across participant-intake and service-request flows.

Software Engineer, Blume Global Pvt Ltd, Bangalore, India

August 2022 - January 2024

- Delivered 6+ RESTful **microservices** in Java and Spring Boot for shipment-lifecycle processing, cutting backend response times by ~20%.
- Provisioned and operated AWS EC2 and S3 across development, staging, and production, standardising deployment environments.
- Secured APIs with JWT authentication and role-based access control, reaching 90% unit-test coverage with JUnit and Mockito.
- Engineered event-driven, distributed workflows on Apache Kafka and automated delivery through Jenkins CI/CD with **Docker** and **Kubernetes**.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frontend and Backend: ReactJS, REST APIs, Microservices, GraphQL, MVC, Spring Boot, Redux, Vue.js, HTML, CSS

Database and Cloud: MySQL, PostgreSQL, AWS (EC2, S3, RDS)

Tools: Docker, Kubernetes, Jenkins CI/CD, GitHub Actions, Apache **Kafka**, JUnit, Mockito, Git, Postman.

Certifications: React, The Complete Guide (Udemy, 2023), Spring Boot 3 and Spring 6 with Hibernate (Udemy, 2023)

PROJECTS

BlueHaven | Java, Vue.js, AWS (EC2, S3, RDS), <https://blue-haven.app/#/>

August 2025 - October 2025

- Architected a **Java** backend with separated controller, service, and repository layers, and designed a normalised relational database schema to support households tracking water pollution habits.
- Built a Vue.js frontend consuming the REST APIs, and deployed the application on **AWS**, using EC2 for hosting, RDS as the relational database, and S3 for storage, gaining practical experience with cloud infrastructure setup.

Bus Booking System | React.js, Spring Boot, REST APIs, SQL,

August 2022 - November 2022

- Built a complete bus booking platform with a **Spring Boot** backend, a **React.js** frontend, and an optimised SQL schema for bookings, routes, and user profiles.
- Used transactional locking to prevent double booking during simultaneous seat reservations.

EDUCATION

Master of Information Technology

Monash University, Melbourne, Australia

February 2024 - December 2025
