PROFESSIONAL SUMMARY

Full-Stack Software Engineer with nearly 2 years of experience building scalable APIs, backend services, and frontend features for logistics applications. Skilled in **Java, Spring Boot, ReactJS, Microservices, SQL, Docker, Kubernetes, AWS, and Kafka**, with proven impact across **API performance, event-driven workflows, CI/CD**, and Agile delivery. Delivered **6+ RESTful APIs**, reduced API response time by **20%**, and contributed to a **35% improvement in delivery velocity**.

EXPERIENCE

Blume Global Pvt Ltd
Software Engineer

Bangalore, India
August 2022 - January 2024

- Designed and developed **6+ RESTful APIs** using **Java, Spring Boot, Microservices**, and **SQL** for shipment lifecycle management, improving backend performance and reducing average API response time by **20%**.
- Built secure backend features using **JWT authentication, role-based access control (RBAC)**, and service-layer validation to improve **API security and access control** across shipment workflows.
- Developed reusable **ReactJS** components and managed application state with **Redux**, making the frontend easier to maintain and improving consistency across key shipment screens.
- Worked on an event-driven bulk shipment pipeline using **Apache Kafka, Kubernetes**, and **Docker**, supporting asynchronous processing and better scalability during high-volume shipment uploads.
- Wrote unit tests using **JUnit** and **Mockito**, achieving **90% test coverage** for critical service and controller layers and **reducing the risk of regression issues**.
- Supported **Jenkins CI/CD** deployment workflows and contributed to a **35% improvement in Agile delivery velocity** by resolving blockers and coordinating with frontend, backend, QA, and stakeholder teams.

EDUCATION

Monash University, Melbourne, Australia
Master of Information Technology

February 2024 - December 2025

Bangalore Institute of Technology, Bangalore, India
Bachelor of Computer Science and Engineering

August 2018 - July 2022

TECHNICAL SKILLS

Languages: Java, JavaScript.

Backend & APIs: Spring Boot, RESTful APIs, GraphQL, Microservices, Event-Driven Architecture, MVC.

Databases: MySQL, PostgreSQL, Firebase Firestore, Room, Redis.

Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, Jenkins CI/CD, GitHub Actions, Apache Kafka.

Certifications:

- React: The Complete Guide (React Router & Redux) - Udemy, 11/2023
- Spring Boot 3 & Spring 6 with Hibernate - Udemy, 2023

ACADEMIC & RECENT PROJECTS

BlueHaven | Java, Relational Database, Vue.js | <https://blue-haven.app/#/>

August 2025 - October 2025

- Developed a full-stack web application with Java RESTful APIs, an optimised relational database schema, and a Vue.js frontend to help households understand and reduce everyday water pollution habits.

Bus Booking System | React.js, Spring Boot, REST APIs, SQL

August 2022 - November 2022

- Developed an end-to-end bus booking system with a **Spring Boot backend**, implementing **RESTful APIs** and an optimised **SQL database schema** for bookings, routes, and user profiles, and built a responsive **React.js frontend** supporting real-time route search and concurrent seat booking handling.
